

# ROUND THE CLOCK PROTECTION FOR YOUR FAMILY AND PROPERTY

## HOW IT WORKS

Homeservice Club™ has been in the business of protecting homeowners for 35 years. With the **Homeservice Security Plan**, we take that protection one step further.

The **Homeservice Security Plan** gives your family complete protection around the clock. Your state-of-the-art **First Alert® Professional Security System** is fully monitored and summons help immediately in case of:

- Fire
- Burglary
- Intruders
- Medical Emergency

The system is monitored at a central monitoring station around the clock. When your system detects a break-in, fire or emergency, it sounds a siren and notifies the monitoring station through your existing telephone line. The alarm is verified and the appropriate emergency help is immediately summoned.

Help is on the way when you need it most!

## SECURITY FACTS

- ▶ Homes equipped with alarm systems are six times less likely to be burglarized.
- ▶ Most fire deaths occur at night while the victims are sleeping.
- ▶ A fire can consume an entire house in five minutes.
